Projects

Spotify - Full stack Web development App   2 Month
🔗 Live link

Tags : React, Next.js, Redux Toolkit, Node.js, Express, MongoDB, Axios, JWT.

- Designed a scalable platform for seamless music streaming and playlist management.
- **Frontend Development:**
- Built a responsive UI using **Next.js**, **React**, and **CSS**.
- Managed application state with **Redux Toolkit** and integrated **API requests** using **Axios**.
- **Backend Development:**
- Created **RESTful APIs** with **Node.js** and **Express** for authentication and playlist features.
- Implemented **user authentication** using **JWT** and stored data in **MongoDB** with **Mongoose**.
- Successfully delivered a **user-friendly app** offering seamless navigation and personalized media experiences.

Walmart-Inspired WebApp - Frontend Development   2 month
🔗 Live link

Tags : React, Tailwind CSS, Firebase, JWT, RESTful APIs, Responsive Design

- Developed an e-commerce platform inspired by Walmart, addressing the need for a user-friendly interface and seamless shopping experience.
- Integrated login, signup, and cart management using **RESTful APIs**.
- Utilized **Firebase** and **JWT** for secure user authentication. Achieved a scalable platform with **user authentication.**
- Designed a responsive UI with **Tailwind CSS** for an intuitive user experience.

Quiz Platform - Frontend Development   2 month
🔗 Live link

Tags : React, Material-UI, Local Storage, Responsive Design, CRUD Operations.

- Built a web application for quiz creation, management, and gameplay to enhance learning and engagement.
- Developed with React and **Material-UI**, incorporating responsive navigation, modals, forms, and interactive quiz gameplay.
- Implemented local storage for saving questions, **CRUD operations** for quiz management, and result navigation.
- Delivered a responsive, reusable, and user-friendly platform with structured layouts using **Material-UI Grid**, improving accessibility and usability.
